**Subject:** conversation with Maureen White

Ayn:

I called Ms. Maureen White (b)(6) privacy to provide geographical information relevant to the Pavillion Ground Water Investigation as you requested.

I learned during the conversation that she is an independent geologist that works with attorneys to represent tribes across the country. She has met with representatives of the tribes owning mineral rights in the Pavillion area and is in the process of meeting with representatives of Senator Barasso and Udall.

She is developing a proposal to conduct activities to support the tribes at Pavillion apparently in the area of natural resource (ground water) damage. She wants to send me the proposal for review. I replied that I would not comment on it but simply forward the proposal to attorneys in EPA Region VIII as part of the record for this site.

Her primary interest right now is gathering information on production wells at the Pavillion Field.

I informed her that I am in the process of downloading cement bond logs, geophysical logs, well completion reports, bradenhead testing data, including analysis of gas, produced water analysis, and pit remediation reports currently posted on the WOGCC internet site.

I told her that this information is public and can be downloaded by anyone.

However, the process of downloading and compiling all of this information is extremely time consuming and tedious. I told her that since I am already doing this, I could send her electronic copies of this information on CDs or a flash drive in about a month.
